

Nobody Fights Alone

Ovarian Cancer Update Webinar
September 22, 2022 . 5:30pm

For women at risk, in treatment, and those caring for someone undergoing treatment

The Promise of Multi-Cancer Early Detection

Michael Osborne is a genetic counselor with deep medical engagement leadership experience for innovative companies in genomic health. He currently serves as southeastern region lead Medical Science Liaison for GRAIL, a company focused on an urgent mission to detect more cancers early, when they are more treatable and potentially curable. Michael's past experience includes significant roles with NxGen MDx, Ambry Genetics, and the University of North Carolina at Chapel Hill Health System.

Maintenance Therapy for Advanced Ovarian Cancer: Considerations for Patients and Care Partners

Lori Willcoxon, BSN, RN, OCN is a Patient Engagement Liaison for GSK Oncology, providing educational presentations with focus on ovarian and endometrial cancers. She is an Oncology Certified Nurse with extensive experience providing educational support for adult hematology oncology patients and care-partners in both inpatient and ambulatory care settings.

Assessment and Revision Of Usual measure for Sexual Dysfunction (ARUSED)

Dr. Christina Wilson is a board certified women's health nurse practitioner and nurse scientist. Dr. Wilson is an Assistant Professor at the University of Alabama at Birmingham School of Nursing where her research focuses on the assessment and treatment of body image and sexual health issues in patients with gynecologic cancer.
